What makes us different- Our personal approach to business, the trust we build with our customers, and our commitment to provide good watch repair services.

5. Colour and Font Choices (with Reasons)

Item	Choice	Reason
Primary colour	Deep Coffee Brown	Gives the website a warm, elegant and sophisticated appearance. Complements with the mechanical and vintage shop aesthetics.
Secondary colour	Muted gold	Adds an elegant, refined touch to the website while complementing the deep coffee brown and beige colour palette. Creates better visual contrast.
Background colour	Beige	Provides a warm, neutral background that complements the deep shades of brown and coffee. Also supports the overall layout well.
Heading font	Georgia	Was chosen as the primary heading font as it is bolder and matches the website and shop's real identity well. The large headings provide good contrast and visuals.
Body font	Georgia with other font-families	Using Georgia alongside compatible font families maintains a consistent typographic style throughout the whole website and reinforces the brand's identity.
